Subject: Site 86 Remedial investigation Work Plan - Passive Soil Gas Survey

Gena, Beth, Bob and Daniel

Our intent for the Site 86 RI is to do a passive soil gas initially to identify areas to focus on. The work plan in Section 4.2.2 indicated the use of Gore Sorbers to do this. Gore Sorbers are the name of a specific product by a specific company. We have found another vendor that can do the same service at a lower cost. The new vendor is Beacon Environmental Services, Inc. and their product description is at <http://www.beacon-usa.com/soilgas.html>. We would like to use the Beacon product, but want to check with you first before we go do it. Please let me know if you have any problems with this.
thanks

Chris
